

BMW Automobiles.

BMW M5.

History

The BMW M5 was developed as a new, independent car by BMW Motorsport GmbH based on the BMW 5 Series. It was tailored to the small circle of sophisticated customers who wanted to combine their aspiration for spirited driving performance with exclusive equipment. The BMW M5 was developed as a new, independent car by BMW Motorsport GmbH based on the BMW 5 Series. The visual appearance only differs from standard 5 Series models in inconspicuous details. The high-power engine from the BMW M635CSi was used to power the car.

Year	1986
Quantity	2,241
Orig.price	DM 80,750

Technical data

Engine	Six-cylinder in-line engine
Displacement	3453 cc
Bore x Stroke	93.4 x 84 mm
Power output	210 kW/286 bhp at 6500 rpm
Transmission	Five-speed sports gearbox
Front brakes	Disc brakes, internally ventilated
Rear brakes	Disc brakes
Dimensions	4620 x 1700 x 1400 mm
Unladen weight	1430 kg
Max. speed	245 km/h (152 mph)
